APPLICATION VARIANCE; APROVED, BUT EXPIRED DUE TO COVID-19 AND OTHER REASONS!

Dear, Board Members

My current Variance application was granted and then expired 1 year from the date of the Board Meeting approval, reason why it was that Department of Health Borough of Oakland received late the approved, ARACHITECTURE/ENGINEERING PLANS for New Septic system designed and stamped as per Request of Borough of Oakland Rules and Regulations, during this time we ran into unexpected Covid-19 Lockdown, and pretty much everything was on hold, although we made multiple phone calls with Department of Buildings, but they always needed the approval from Department of Health in regards to Septic system in order to release the permits,,

With respect to BOROUGH OF OAKLAND AND ITS MEMBERS,

I am asking for consideration for an extension of my previous Variance Approval!

With respect.
