

Construction of upgrades and improvements to Borough of Oakland Sewage Treatment Plant Decommissioning Project were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (Infrastructure Bank) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Infrastructure Bank to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by decommissioning the three (3) failing treatments plants and converting to pumping stations to convey flow to the Northwest Bergen County Utilities Authority for residents and businesses in the existing sewer service area.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
